Technology Data

Name	Dandrail Forming Machine
Reference Photo	
Model	SP-T506075
Motor power	7.5KW
Reducer	350 type
Feed material	iron pipe
Feeding tube diameter	φ60mm & φ50mm & φ75mm
Forming Roller	8 forming + 2 straightening
Working speed	10 meters / minute
Roller material	GCr15 heat treatment after finishing

Spindle material	40Cr after quenching and tempering
Transmission mode	1.2 inch chain sprocket drive
Formed Shape	 <p>The image displays three views of a metal sprocket component. The top view shows a sprocket with a width of 65 mm and a height of 42 mm. The middle view shows a sprocket with a width of 75 mm and a height of 30 mm. The bottom view shows a sprocket with a width of 75 mm and a height of 58 mm. The sprocket has a complex, curved shape with a central opening and a small notch at the bottom.</p>
